Replacement Parts for Caterpillar® Engines and Equipment

Gasket Catalog

Caterpillar® is a registered trademark of Caterpillar®, Inc. FP Diesel is not affiliated with Caterpillar®, Inc.

FEDERAL MOGUL

Tractors, Loaders, Scrapers, etc.
(All engines used in Caterpillar machinery)

Instructions:

To use the MACHINE SECTION of this catalog, it is necessary to determine the Machine Model, Machine Serial Number, Engine Serial Number and Engine Arrangement Number.

1. Turn to MACHINE MODEL INDEX. Based on the model of your machine, find the proper catalog page number.
2. Turn to the catalog page number indicated and determine the Gasket Groups required based on your machine's specifications.

NOTES:

- **FINDING THE NECESSARY INFORMATION**
  Engine arrangement and serial numbers are generally located on the valve cover or the side of the block and occasionally on the block near the water pump or on the flywheel housing. They may also be found on the serial number plate located on or near the dashboard by the operator's seat of the machine.
- **SELECTING THE GROUPS REQUIRED TO COMPLETE THE REPAIR**
  Gasket Groups are packaged for either major or minor repairs. To determine the type of gasket groups needed for your application, please turn to the GROUP DEFINITIONS pages in the front of this catalog where descriptions of the contents of the Gasket Groups are provided.
- In certain instances, applications shown can also be found in the "Old Style" section of this catalog. In these instances it will be noted with a "Y" in the column labeled "Old Style Available".

Industrial, Marine, Gen Set and Truck Engines. (engines NOT used in Caterpillar machinery)

Instructions:

To use the ENGINE SECTION of this catalog, it is necessary to determine the Engine Number, Engine Serial Number and Engine Arrangement Number.

1. Turn to ENGINE INDEX. Based on the number of your engine, find the proper catalog page number.
2. Turn to the catalog page number indicated and determine the Gasket Groups required based on your machine's specifications.

NOTES:

- **FINDING THE NECESSARY INFORMATION**
  Engine arrangement and serial numbers are generally located on the valve cover or the side of the block and occasionally on the block near the water pump or on the flywheel housing. They may also be found on the serial number plate located on or near the dashboard by the operator's seat of the machine.
- **SELECTING THE GROUPS REQUIRED TO COMPLETE THE REPAIR**
  Gasket Groups are packaged for either major or minor repairs. To determine the type of gasket groups needed for your application, please turn to the GROUP DEFINITIONS pages in the front of this catalog where descriptions of the contents of the Gasket Groups are provided.
- In certain instances, applications shown can also be found in the "Old Style" section of this catalog. In these instances it will be noted with a "Y" in the column labeled "Old Style Available".

Instructions:

To use the NATURAL GAS SECTION of this catalog, it is necessary to determine the Engine Number, Engine Serial Number and Engine Arrangement Number.

1. Turn to NATURAL GAS INDEX. Based on the number of your engine, find the proper catalog page number.
2. Turn to the catalog page number indicated and determine the Gasket Groups required based on your machine's specifications.

NOTES:

- **FINDING THE NECESSARY INFORMATION**
  Engine arrangement and serial numbers are generally located on the valve cover or the side of the block and occasionally on the block near the water pump or on the flywheel housing. They may also be found on the serial number plate located on or near the dashboard by the operator's seat of the machine.
- **SELECTING THE GROUPS REQUIRED TO COMPLETE THE REPAIR**
  Gasket Groups are packaged for either major or minor repairs. To determine the type of gasket groups needed for your application, please turn to the GROUP DEFINITIONS pages in the front of this catalog where descriptions of the contents of the Gasket Groups are provided.
- In certain instances, applications shown can also be found in the "Old Style" section of this catalog. In these instances it will be noted with a "Y" in the column labeled "Old Style Available".

Torque Converter or Torque Divider, Transmission, Flywheel Clutch, Transfer Gear, Oil System, Etc.

Instructions:

To use the TRANSMISSION SECTION of this catalog, it is necessary to determine the Machine Serial Number and/or Transmission Serial Number along with the Transmission Arrangement Number.

1. Turn to TRANSMISSION INDEX. Based on the model of your machine, find the proper catalog page number.
2. Turn to the catalog page number indicated and determine the Gasket Groups required based on your machine's specifications.

NOTES:

- Transmission serial and arrangement numbers are generally located on a tag on the transmission and/or on the side of the serial number plate on or near the dashboard by the operator's seat of the machine.

Industrial, Marine, Gen Set and Truck Engines. (engines NOT used in Caterpillar machinery)

The "Old Style" Group sections of this catalog are superseded by the preceding sections. Most of the Gasket Groups indicated in this section are no longer available from the O.E.M. However, as a service to our customers who prefer to reduce stock requirements and enjoy ease of ordering only a Basic and Supplementary Group as necessary for a Complete Overhaul, we shall continue to supply these items for as long as reasonably possible. Please consult your current FP Diesel price list to determine availability of the "Old Style" Groups listed in this section.

Instructions:

To use the "Old Style" ENGINE SECTION of this catalog, it is necessary to determine the Engine Number, Engine Serial Number and Engine Arrangement Number.

1. Turn to ENGINE INDEX. Based on the number of your engine, find the proper catalog page number.
2. Turn to the catalog page number indicated and determine the Gasket Groups required based on your machine's specifications.

NOTES:

- **FINDING THE NECESSARY INFORMATION**
  Engine arrangement and serial numbers are generally located on the valve cover or the side of the block and occasionally on the block near the water pump or on the flywheel housing. They may also be found on the serial number plate located on or near the dashboard by the operator's seat of the machine.
- **SELECTING THE GROUPS REQUIRED TO COMPLETE THE REPAIR**
  Normally two kits are required for a COMPLET OVERHAUL – a Basic Overhaul (contains gaskets common to several serial numbers) and a Supplementary (contains items for a specific series that may not be found in other sets. Note the large number of supplementary kits for different serial numbers). In the "Basic" column, where a "C" follows the part number, these are "Complete" overhaul groups – no other sets are necessary.
- Complete Overhaul Gasket Groups, whether a BASIC & SUPPLEMENTARY or a COMPLETE Group, contain gaskets to complete a Valve Grind Overhaul.
- Starting engine clutch mechanism gaskets and water pump gasket groups are not included in Main Engine Basic Groups – they must be ordered separately as needed.
- In certain instances, applications shown can also be found in the "Old Style" section of this catalog. In these instances it will be noted with a "Y" in the column labeled "Old Style Available".

= PLEASE CHECK WATER PUMP BEFORE ORDERING. THESE SERIAL NUMBERS MAY USE 6H5839 OR 5P5841

Torque Converter or Torque Divider, Transmission, Flywheel Clutch, Transfer Gear, Oil System, Etc.

Instructions:

To use the "Old Style" TRANSMISSION SECTION of this catalog, it is necessary to determine the Machine Serial Number and/or Transmission Serial Number along with the Transmission Arrangement Number.

1. Turn to TRANSMISSION INDEX. Based on the model of your machine, find the proper catalog page number.
2. Turn to the catalog page number indicated and determine the Gasket Groups required based on your machine's specifications.

NOTES:

- Transmission serial and arrangement numbers are generally located on a tag on the transmission and/or on the side of the serial number plate on or near the dashboard by the operator's seat of the machine.

Series 60 Cross Head Piston

- Improved material properties
- Reduced stress concentration at key points
- Optimized radius of struts
- Increased standup height

FP Diesel ML^{7}™ Head Gaskets

- Patented multi-layer design provides unprecedented strength
- Expanded graphite outer facings fills in minor voids in sealing surfaces
- Stainless steel armors provide robust, long lasting combustion seal
- Solid steel core provides enhanced lateral stability

Valvetrain Components

- Manufactured to the highest quality standards
- OEM specification materials used with upgrades to super alloys such as stellite, nickel, nimonic and inconel where needed for problem applications
- Available parts include valves, springs, guides, keepers, rotocaps, rocker parts, lifters, seals, seats and more

FP DIESEL

GLOBAL TECHNOLOGY behind every part
